ABOUT

I'm a User Experience Designer, Engineer with a strong background in developing and implementing interactive, intuitive, user-centered design solutions for web and mobile. Leverage AI tools throughout the design workflow — from generating visual assets and iterating concepts to solving complex design challenges with speed and precision.

In addition to my technical expertise, I also possess strong interpersonal skills. I consider myself a team player, attentively listening to colleagues' opinions and adeptly managing discussions to reach a consensus. My communication and collaboration skills enable me to work effectively with developers, product owners, and clients, ensuring smooth interaction among all parties involved in a project.
